

Quotes from Kolb Workshop

“Just because your learner didn’t understand what you hoped he would, does that mean he learned nothing?”

“Every human being possesses both mechanisms as an expression of his natural life rhythm.”

“Descriptions can be manufactures and manipulated in themselves.”

“Is the simple perception of experience not sufficient?”

“Knowledge results from the combination of grasping experience and transforming it.”

“It’s too pretty not to be true!” (W.R. to his theory)

“Ultimately, the structure of the brain should explain learning. It’s only natural.”

“His hypothesis: the learning cycle arises naturally from the structure of the brain.”
